

Build your happier, healthier lifestyle

Ballarat Neighbourhood Houses are friendly places where you can join other community members to come together to pursue common interests, join activities and events, learn new skills, and have fun.

Neighbourhood Houses are all very different and unique - you are welcome to visit, explore and make the right connections for you. We recommend discussing how community based activities support your health with your medical practitioner. Medical referrals are not required, however, a medical referral will assist your neighbourhood house to understand your needs and support your pathway to a healthier you.

Your health practitioner recommends:

- Active lifestyle opportunities**
- Healthy eating and food access**
- Community connections**
